5. Glossary

Benchmarks

LT12TRUU Index

Short Term US Treasury Bills | Bloomberg Barclays Short Treasury Total Return Value Unhedged U

The Bloomberg Barclays US Short Treasury Index measures the performance of the US Treasury bills, notes, and bonds under 1 year to maturity. STRIPS are excluded from the index because their inclusion would result in double-counting.

LUACTRUIIIndex

US Investment Grade | Bloomberg Barclays US Corporate Total Return Value Unhedged USD

The Bloomberg Barclays US Corporate Bond Index measures the investment grade, fixed-rate, taxable corporate bond market. It includes USD denominated securities publicly issued by US and non-US industrial, utility and financial issuers.

HOAO Index

US High Yield | ICE BofA US High Yield Index

The ICE BofA US High Yield Index tracks the performance of US dollar denominated below investment grade corporate debt publicly issued in the US domestic market.

SPXT Index

US Equities – S&P 500 | S&P 500 Total Return Index

S&P 500 Total Return Index. Calculated intraday by S&P based on the price changes and reinvested dividends of S&P 500 with a starting date of Jan 4, 1988.

DJITR Index

US Equities – Dow Jones | Dow Jones Industrial Average TR

The Dow Jones Industrial Average Total Return Index tracks the total return of the member stocks of the DJI Index. Dividends are reinvested. This index prices once per day at market close by Dow Jones. The index is quoted in USD.

XCMPIP Index

US Equities – Nasdaq | NASDAQ Composite Total Return Index

The NASDAQ Composite TR Index includes reinvested cash dividends based on the members of the NASDAQ Composite index.

NDDUWI Index

Global Equities | MSCI World Net Total Return USD Index

MSCI Daily Total Return Net World USD. Morgan Stanley Capital International Equity Indices in US Dollars. Indices with net dividends reinvested use the same dividend minus-tax-credit calculations, but subtract withholding taxes retained at the source for foreigners who do not benefit from a double taxation treaty.

Client Investment Profile: Descriptions

Profile 1

Client has a low tolerance for risk, and seeks a great degree of capital preservation. Client expects a very high level of liquidity based on low risk investments, with the ability to promptly convert all of his or her portfolio to cash without incurring significant penalties. The client anticipates his or her investments to grow at a small rate of return that remains very close to current nominal short-term U.S. interest rates.

Profile 2

Client has a low to moderate tolerance for risk, and seeks some level of capital preservation with a high degree of liquidity where investments may be converted to cash in a short time period without incurring significant penalties. The client expects a low to moderate rate of return that will likely occur during a longer time horizon. Client accepts that his or her portfolio value will experience a degree of fluctuation that is higher than conservative investments, but wants to be somewhat protected from sudden declines in the portfolio.

Profile 3

Client has a medium tolerance for risk, seeks above-average growth of his or her investment by employing a medium to long-term strategy. To achieve this intended growth, client accepts that the portfolio value may experience frequent fluctuations that could result in sudden declines in the portfolio. Client understands and accepts that his or her investments may have a low to medium level of liquidity, consequently not being readily convertible to cash.

Profile 4

Client has a medium to high tolerance for risk, and seeks an above-average growth of capital, primarily over a long-term strategy. Client rarely expects to convert investments into cash, thus requiring a low level of liquidity. Client accepts that his or her portfolio value may experience significant fluctuations.

Profile 5

Client has a high tolerance for risk, and seeks maximum returns by taking considerable additional risk. Client does not require cash from the investment account and expects to realize a return on investments over a broad timeframe. Client accepts that the portfolio value may experience frequent and substantial fluctuations, and may result in total loss of capital because at any time assets may be 100% allocated to riskier securities.

General Notes

NOT FDIC INSURED - NO BANK GUARANTEE - MAY LOSE VALUE

Pricing: Securities prices may vary from actual liquidation value. Prices shown should only be used as a general guide to portfolio value. Prices are received from various pricing services. However, pricing services are sometimes unable to provide timely information. Where pricing sources are not readily available, particularly on certain debt securities, estimated prices may be generated by a matrix system taking various factors into consideration. The pricing of listed options takes into account the last closing price, as well as the current bid and offer prices.

Option Disclosure: Information with respect to commissions and other charges incurred in connection with the execution of option transactions has been included in confirmations previously furnished to you. A summary of this information is available to you promptly upon your written request directed to your introducing firm. In order to assist your introducing firm in maintaining current background and financial information concerning your option accounts, please promptly advise them in writing of any material change in your investment objectives or financial situation. Expiring options which are valuable are exercised automatically pursuant to the exercise by exception procedure of the Options Clearing Corporation. Additional information regarding this procedure is available upon written request to your introducing firm.

Exchange-Traded Products may include any combination of exchange-traded funds, exchange-traded notes, and other exchange-traded products. The reference currency of this report is US Dollars.

The custody fee is calculated on the last business day of each month using the available market value of the securities in your account on that date. The market prices, unless otherwise noted, have been obtained from independent vendor services, which we believe to be reliable. In some cases, the pricing vendor may provide prices quoted as of the last business day in any given month, which may not represent the final pricing, which is available at D+2. Therefore, the EOM market value shown on client's statements may not accurately reflect the EOM market value available to for the custody fee calculation, despite our best efforts to match said value. As a result, and in some cases, calculations by clients to compute the custody fee using the statement's EOM market value may not equal the actual custody fee as debited on the account.
